The Journal of Heredity, 1964

A

Abbott, U. K., *et al.*, Plumage Color Mutants in Ring Neck Pheasants, 151.
AIBS Governing Board Meetings: 75; 219.
Al-Fakhry, Abdullah K., *et al.*, Somatic Chromosomes of Babala, 57.
Allelic Segregation in Interspecific Hybrids, A. M. Showalter, 183.
Alston, Ralph E. and Karen Hempel, Chemical Documentation of Interspecific Hybridization, 265.
Anderson, David E. and D. W. Vogt, Studies on Bovine Ocular Squamous Carcinoma ("Cancer Eye"): XV. Heritability of Susceptibility, 133.
Angel, Huguette and M. Soller, Polledness and Abnormal Sex Ratios in Saanen Goats, 139.

Animal Genetics:

Bees: sex determination, 91; five new eye-color mutants, 207.
Cat, taillessness and associated anomalies, 225.
Cattle: selection for twinning in a grade Aberdeen-Angus herd, 73; heritability of susceptibility to cancer eye, 133; coat color in carabaos of the Philippines, 159.
Dogs: polycystic mononephrosis, 29; osmotic resistance of erythrocytes, 146; development of breed variables, 174.
Drosophila melanogaster, recessive esterase deficiency, 76.
Fowl: egg shell pigmentation in Japanese quail, 136; plumage color mutants in ring neck pheasants, 151; genetic basis of the Erminette breed of chickens, 200.
Frogs: spotting patterns–environmental control of genic expression, 47; karyotype of *Rana sylvatica* and *Rana pipens*, 124; spotting variations, 234.
Goats: polledness and abnormal sex ratios in Saanen, 139; polledness and litter size in Saanen, 301.
Horse, coat color in small horses of the Philippines, 220.
Mice: balanced lethal sex-chromosome system?, 7; developmental homeostasis-locomotor activity and grooming, 84; new splotch alleles, 97; sex difference in recombination frequency in the albinism-hemoglobin interval of linkage group I, 101; hair of fuzzy, 121; bases for failure to induce transformation *in vivo* with exogenous homologous DNA, 163; parity and Mendelian segregation, 177; independence of sex ratio and diet-induced changes in blood-pH, 187; new mutation causing circling behavior, 247; changes in thyroid gland during life-span, 270; differential effects of prenatal maternal stress on behavior, 289.
Mosquito, salivary gland chromosomes of *Anopheles punctipennis*, 9.
Mule, chromosome study of alleged fertile mare, 31.
Sheep, chromosomes of domestic, 61.

An Unsad Farewell to Mr. Lysenko, J. M. Lalley, 295.
Arisumi, Toru, Interspecific Hybridization in African Violets, 181; Colchicine-Induced Tetraploid and Cytochimeral Daylilies, 255.
Asmundson, V. S., *et al.*, Plumage Color Mutants in Ring Neck Pheasants, 151.

B

Baker, Richard H. and J. B. Kitzmiller, Salivary Gland Chromosomes of *Anopheles punctipennis*, 9.
Balanced Lethal Sex-Chromosome System?, L. N. Brown and C. H. Conaway, 7.
Bases for Failure to Induce Transformation *in vivo* With Exogenous, Homologous DNA: I. Incorporation in Mice of P^{32} and C^{14} Labels of Donor DNA into Recipient Gonad DNA, Chai H. Yoon, 163.
Benirschke, Kurt, *et al.*, Chromosome Study of an Alleged Fertile Mare Mule, 31.
Benson, Lyman, Flowering Plants of Southern Africa (Rev.), 60.
Bergh, B. O.: *et al.*, Three Variegated Seedling Mutants in the Pepper: Multiple Allelism Indicated in Crossing Studies, 79; and L. F. Lippert, Six New Mutant Genes in the Pepper, *Capsicum annuum* L., 296.
Blazey, Douglas A., *et al.*, Nematode Resistance in the Common Bean, 20.
Bohn, G. W. and Joseph A. Principe, A Second Male-Sterility Gene in the Muskmelon, 211.

Books Reviewed:

Grant, Verne, The Origin of Adaptations, 44.
Riley, Herbert P., Families of Flowering Plants of Southern Africa, 60.
Stahl, Franklin W., The Mechanics of Inheritance, 224.

Borland, R., The Chromosomes of Domestic Sheep, 61.
Brief Note for a Fiftieth Anniversary Year, 132.
Browder, Leon W. and John Davison, Spotting Variations in the Leopard Frog: A Test for the Genetic Basis in the *Rana pipiens* "Burnsi" Variant, 234.
Brown, L. N. and C. H. Conaway, A Balanced Lethal Sex-Chromosome System?, 7.
Burling, Richard L., Population Control in the Long Run, 120.

C

Cameron, J. W., *et al.*, Chimeral Basis for Color in Pink and Red Grapefruit, 23.
Carter, Robert C. and Edward A. Mechling II, Selection for Twinning in a Grade Aberdeen-Angus Herd, 73.
Carter, Ross M., *et al.*, Chromosome Study of an Alleged Fertile Mare Mule, 31.
Chai, C. K., *et al.*, Changes in Thyroid Gland During Life-Span of Mice: Thyroid I^{131} Retention and Turnover Rate, 270.
Changes in Thyroid Gland During Life-Span of Mice: Thyroid I^{131} Retention and Turnover Rate, C. K. Chai, *et al.*, 270.
Chemical Documentation of Interspecific Hybridization, Ralph E. Alston and Karen Hempel, 267.
Chimeral Basis for Color in Pink and Red Grapefruit, J. W. Cameron, *et al.*, 23.
Chromosome Numbers in the Genus *Ipomoea*, Alfred Jones, 216.
Chromosomes of Domestic Sheep, R. Borland, 61.
Chromosome Study of an Alleged Fertile Mare Mule, Kurt Benirschke, *et al.*, 31.
Coat Color in Carabaos of the Philippines, W. Ralph Singleton and Ibarra Santos, 159.
Coat Color in Small Horses of the Philippines, W. R. Singleton and J. N. Dent, 220.
Coe, E. H., Jr. and K. R. Sarkar, The Detection of Haploids in Maize, 231.
Colchicine-Induced Somatic Chromosome Reduction in Sorghum: IV. An Induced Haploid Mutant, G. M. Simantel and J. G. Ross, 3.
Colchicine-Induced Tetraploid and Cytochimeral Daylilies, Toru Arisumi, 255.
Conoway, C. H. and L. N. Brown, A Balanced Lethal Sex-Chromosome System?, 7.
Confusing, But Hardly Sordid, W. R. Singleton, 19.
Cook, A. A., *et al.*, Three Variegated Seedling Mutants in the Pepper: Multiple Allelism Indicated in Crossing Studies, 79.
Corrugated Dwarf Tobacco: A Semidominant Lethal Mutation in *Nicotiana tabacum* L., C. E. Dean, 104.
Coyne, Dermot P., Species Hybridization in *Phaseolus*, 5.

D

Dahlstrom, D. E. and J. H. Lonnquist, A New Allele at the Sugary-1 Locus in Maize, 242.
Davison, John: A Study of Spotting Patterns in the Leopard Frog, III. Environmental control of Genic Expression, 47; and Leon W. Browder, Spotting Variations in the Leopard Frog, A Test for the Genetic Basis in the *Rana pipiens* "Burnsi" Variant, 234.
Dayton, D. F. and J. B. Mowry, Inheritance of Susceptibility to Apple Blotch, 129.
Dean, D. C., Corrugated Dwarf Tobacco: A Semidominant Lethal Mutation in *Nicotiana tabacum* L., 104.
DeFries, J. C., Prenatal Maternal Stress in Mice: Differential Effects on Behavior, 289.
Dent, J. N. and W. R. Singleton, Coat Color in Small Horses of the Philippines, 220.
Detection of Haploids in Maize, E. H. Coe, Jr. and K. R. Sarkar, 231.
Development of Breed Variables in the Dog, M. W. Fox, 174.
Developmental Homeostasis in Behavior of Mice: Locomotor Activity and Grooming, Arnold D. Mordkoff, *et al.*, 84.
Diagnostic Characters in *Sansevieria*: Inheritance in an Interspecific Hybrid, J. F. Joyner and and F. D. Wilson, 39.
Dickie, Margaret M., New Splotch Alleles in the Mouse, 97.
Drescher, W. and W. C. Rothenbuhler, Sex Determination in the Honey Bee, 91.

E

Egg Shell Pigmentation in Japanese Quail: Genetic Control of the White Egg Trait, H. K. Poole, 136.
el Banby, M. A., *et al.*, Five New Eye-Color Mutants in the Honey Bee, 207.
Ellis, Brenda and W. Ralph Singleton, Inheritance of Red Hair for Six Generations, 261.

F

Female-Sterile Mutant in the Tomato, Shigemi Honma and S. C. Phatak, 143.
Filosa, S. Huber and K. F. Stein, A New Mutation Causing Circling Behavior in Mice, 247.
Five New Eye-Color Mutants in the Honey Bee, H. H. Laidlaw, *et al.*, 207.
Flowering Plants of Southern Africa, (Rev.), Lyman Benson, 60.
Fox, M. W.: Inherited Polycystic Mononephrosis in the Dog, 29; Osmotic Resistance of Erythrocytes, Canine Breed Differences, 146; Development of Breed Variables in the Dog, 174.

G

Genetic Basis of the Ermanette Breed of Fowls, F. B. Hutt, 200.
Genetic Relationships among Autotetraploid Relatives, Charles S. Levings, III, 262.
Gentile, A. G., *et al.*, Nematode Resistance in the Common Bean, 20.
Grogan, C. O., *et al.*, Somatic Chromosomes of Babala, 57.

H

Hair of the Fuzzy Mouse, Stanley J. Mann, 121.
Haubenstock, Harriette S. and J. A. Weir, Independence of Sex Ratio and Diet-Induced Changes in Blood-pH of Mice, 187.
Haynes, F. L., Jr., Pachytene Chromosomes of *Solanum canasense*, 168.
Hempel, Karen and Ralph E. Alston, Chemical Documentation of Interspecific Hybridization, 267.
Hennen, Sally, The Karyotype of *Rana sylvatica* and Its Comparison with the Karyotype of *Rana pipiens*, 124.

Hollander, W. F., Repulsive Thoughts on Coupling, 17.
Honma, Shigemi and S. C. Phatak, A Female-Sterile Mutant in the Tomato, 143.

Human Genetics:

Albinism, incidence in Cuna moon-children, 115.
Hair, inheritance of red, 261.
Population control in the long run, 120.

Hutt, F. B., Genetic Basis of the Erminette Breed of Fowls, 200.

I

Incidence of Cuna Moon-Child Albinos, Clyde Keeler, 115.
Independence of Sex Ratio and Diet-Induced Changes in Blood-pH of Mice, J. A. Weir and Harriette S. Haubenstock, 187.
Inheritance of Neoplastic Pod in the Pea, V. W. Nuttall and L. H. Lyall, 184.
Inheritance of Red Hair for Sex Generations, W. Ralph Singleton and Brenda Ellis, 261.
Inheritance of Susceptibility to Apple Blotch, J. B. Mowry and D. F. Dayton, 129.
Inherited Polycystic Mononephrosis in the Dog, M. W. Fox, 29.
Interspecific Hybridization in African Violets, Toru Arisumi, 181.

J

Johnson, F. M., A Recessive Esterase Deficiency in *Drosophila*, 76.
Johnson, F. N. and L. C. Strong, Parity and Mendelian Segregation, 177.
Jones, Alfred, Chromosome Numbers in the Genus *Ipomoea*, 216.
Joyner, J. F. and F. D. Wilson, Diagnostic Characters in *Sansevieria*: Inheritance in an Interspecific Hybrid, 39.

K

Karyotype of *Rana sylvatica* and Its Comparison with the Karyotype of *Rana pipiens*, Sally Hennen, 124.
Keeler, Clyde, The Incidence of Cuna Moon-Child Albinos, 115.
Kempenich, Ora and M. Soller, Polledness and Litter Size in Saanen Goats, 301.
Kitzmiller, J. B. and Richard H. Baker, Salivary Gland Chromosomes of *Anopheles punctipennis*, 9.

L

Laidlaw, H. H., *et al.*: Five New Eye-Color Mutants in the Honey Bee, 207.
Lalley, J. M., An Unsad Farewell to Mr. Lysenko, 295.
Lalor Foundation Grants and Awards for 1965, 210.
Lantz, F. H., *et al.*, Plumage Color Mutants in Ring Neck Pheasants, 151.
Lavine, Robert A., *et al.*, Developmental Homeostasis in Behavior of Mice: Locomotor Activity and Grooming, 84.
Lenz, John L., *et al.*, Changes in Thyroid Gland During Life-Span of Mice: Thyroid I^{131} Retention and Turnover Rate, 270.
Levings, Charles S., III, Genetic Relationships among Autotetraploid Relatives, 262.
Lippert, L. F.: *et al.*, Three Variegated Seedling Mutants in the Pepper: Multiple Allelism Indicated in Crossing Studies, 79; and B. O. Bergh, Six New Mutant Genes in the Pepper, *Capsicum annuum* L., 296.

Lonnquist, J. H. and D. E. Dahlstrom, A New Allele at the Sugary-1 Locus in Maize, 242.
Low, Richard J., *et al.*, Chromosome Study of an Alleged Fertile Mare Mule, 31.
Low-Temperature Albinism in Oats, *Avena strigosa* Schreb., H. G. Marshall, 286.
Lyall, L. H. and V. W. Nuttall, Inheritance of Neoplastic Pod in the Pea, 184.

M

Mann, Stanley J., The Hair of the Fuzzy Mouse, 121.
Manx Factor in Domestic Cats: A Possible Genetic Basis for Expressivity of Taillessness and Other Associated Anomalies, Neil B. Todd, 225.
Marshall, H. G., Low-Temperature Albinism in Oats, *Avena strigosa* Schreb., 286.
Mechanics of Molecular Genetics, H. H. Plough (Rev.), 224.
Mechling, Edward A., II and Robert C. Carter, Selection for Twinning in a Grade Aberdeen-Angus Herd, 73.
Meyer, Vesta G., A Test for Genetic Homogeneity of External-Ovule F_1 Plants with Upland Cotton Cytoplasm, 158.
Miravalle, Robert J., A New Bulked-Pollen Method for Cotton Cross-Pollination, 276.
Miyagawa, S. T., *et al.*, Nematode Resistance in the Common Bean, 20.

Mordkoff, Arnold M. *et al.*, Developmental Homeostasis in Behavior of Mice: Locomotor Activity and Grooming, 84.
Morrison, J. L., *et al.*, Changes in Thyroid Gland During Life-Span of Mice: Thyroid I^{131} Retention and Turnover Rate, 270.
Mowry, J. B. and D. F. Dayton, Inheritance of Susceptibility to Apple Blotch, 129.

N

Nelson, Oliver E. and A. J. Ullstrup, Resistance to Leaf Spot in Maize: Genetic Control of Resistance to Race I of *Helminthosporium carbonum* Ull., 195.
Nematode Resistance in the Common Bean, Douglas A. Blazey, *et al.*, 20.
New Allele at the Sugary-1 Locus in Maize, D. E. Dahlstrom and J. H. Lonnquist, 242.
New Bulked-Pollen Method for Cotton Cross-Pollination, Robert J. Miravalle, 276.

New Mutation Causing Circling Behavior in Mice, K. F. Stein and S. Huber Filosa, 247.
New Splotch Alleles in the Mouse, Margaret M. Dickie, 97.
Nineteen sixty-five Hoblitzelle National Award in the Agricultural Sciences, 28.
Nuttall, V. W. and L. H. Lyall, Inheritance of Neoplastic Pod in the Pea, 184.

O

Olson, E. O., *et al.*, Chimeral Basis for Color in Pink and Red Grapefruit, 23.
Osmotic Resistance of Erythrocytes: Canine Breed Differences, M. W. Fox, 146.

P

Pachytene Chromosomes of *Solanum canasense*, F. L. Haynes, Jr., 168.
Pai, Ok Joo, Some Chromosome Numbers of Cultivated Plants, 186.
Parity and Mendelian Segregation, L. C. Strong and F. N. Johnson, 177.
Phatak, S. C. and Shigemi Honma, A Female-Sterile Mutant in the Tomato, 143.

Plant Genetics:

African violet interspecific hybridization, 181.
Apple, susceptibility to blotch, 129.
Autotetraploids, genetic relationships, 262.
Babala, somatic chromosomes, 57.
Baptisia, chemical documentation of interspecific hybrids, 267.
Beans: species hybridization in *Phaseolus*, 5; nematode resistance, 20.
Chromosome numbers of some cultivated plants, 186.
Cotton: vital-stain testing of pollen viability, 154; test for genetic homogeneity of external-ovule F_1 plants with upland cotton cytoplasm, 158; new bulked-pollen method for cross-pollination, 276.
Daylilies, colchicine-induced tetraploid and cytochimeral, 255.
Grapefruit, chimeral basis for color in pink and red, 23.
Ipomoea, chromosome numbers, 216.
Lilium canadense, allelic segregation in interspecific hybrids, 183.
Maize, transfer of intact segments of chromosomes, 107; resistance to leaf spot, 195; detection of haploids, 231; new allele at the sugary-1 locus, 242; tissue-specific isozyme variations, 281.
Muskmelon, second male-sterility gene, 211.
Oats: low-temperature albinism, 286.
Pea, inheritance of neoplastic pod, 184.
Pepper: three variegated seedling mutants, 79; six new mutant genes, 296.
Sansevieria, diagnostic characters in interspecific hybrid, 39.
Solanum canasense, pachytene chromosomes, 168.
Sorghum, colchicine-induced somatic chromosome reduction, 3.
Tobacco, corrugated, a semidominant lethal mutation, 104.
Tomato, female-sterile mutant, 143.

Plough, H. H. The Mechanics of Molecular Genetics (Rev.), 224.
Plumage Color Mutants in Ring Neck Pheasants, V. S. Asmundson, *et al.*, 151.
Polledness and Abnormal Sex Ratios in Saanen Goats, M. Soller and Huguette Angel, 139.
